iStream

Higher Education programmes on Immersive journalism approach

The project

The iStream project is an Erasmus+ Cooperation partnerships in higher education (KA220-HED). It intends to bridge the gap of competences in the use of immersive technologies in the media, journalism and communication sectors.

The results

iStream Competence Framework
The immersive journalist profile

iStream Curriculum
A one-year university study track on immersive journalism

iStream Syllabus
Supporting materials for Higher education teachers

iStream Lab Guidelines
Resources to set up and manage an Immersive Journalism Lab

iStream Training Course
Technical expertise and hands-on sections on immersive technologies.
